X-Mem Project

Jacqueline Lo and Rommel Castro

Part 2.1

Part 2.2

Throughput vs. Stride Length (chunk size 64 bits)
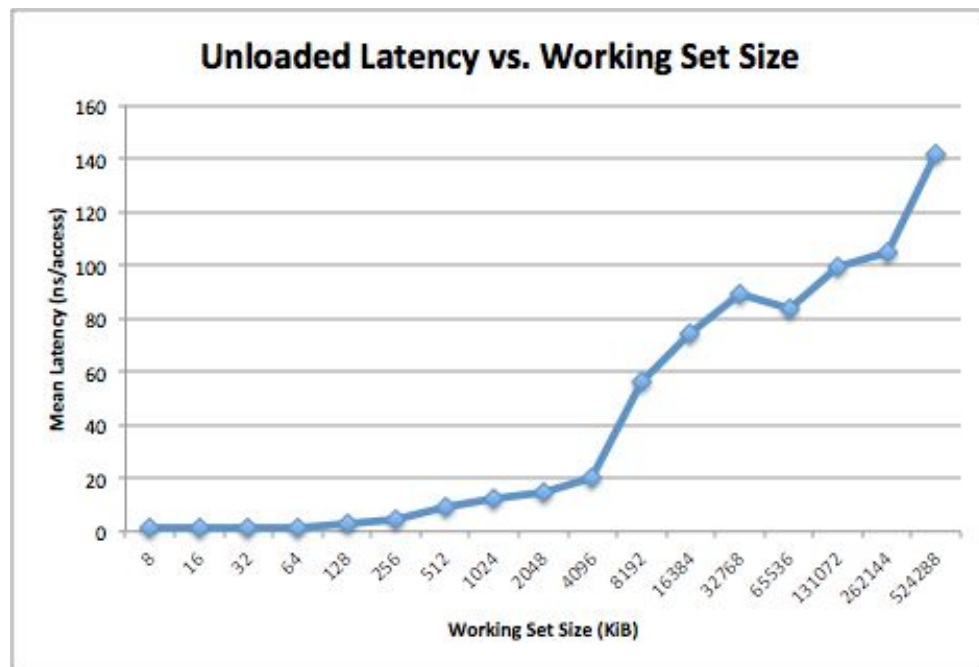

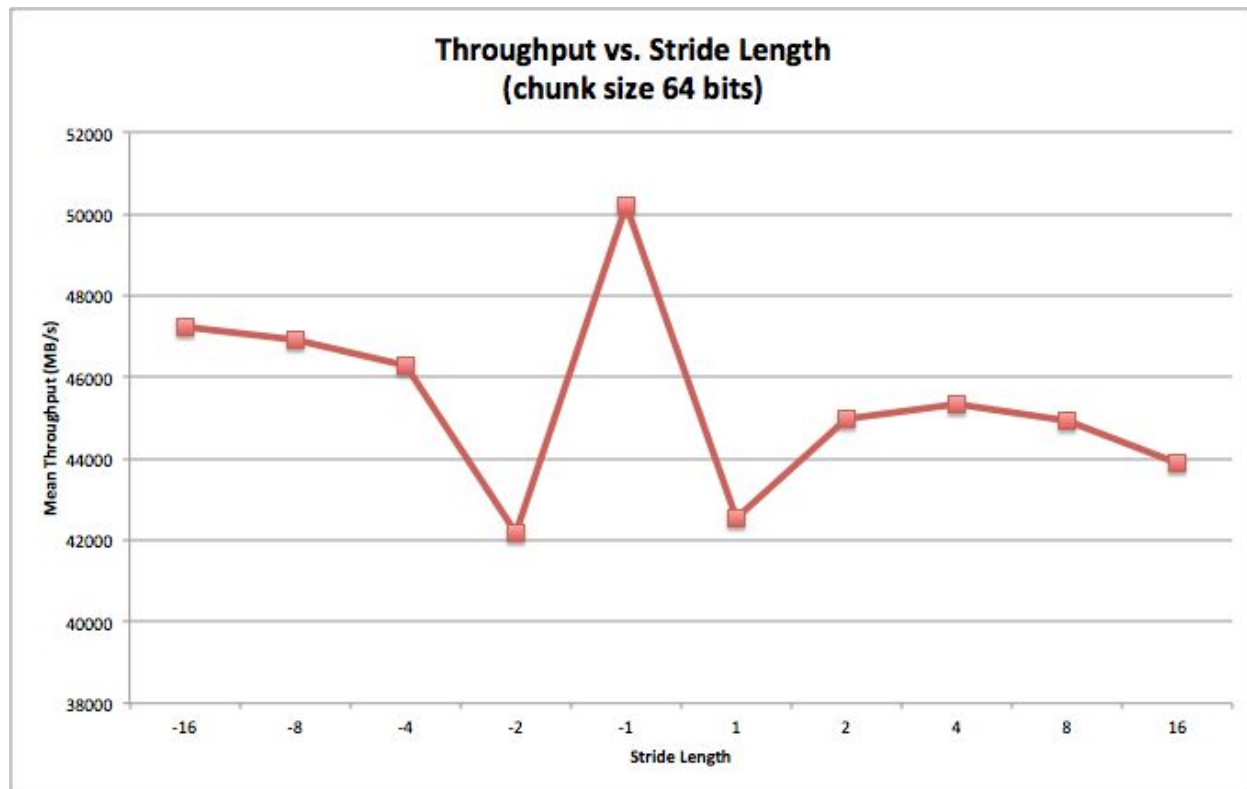

Part 2.2

Part 3

Major code changes:

- Add support for a 4th MLP parameter to chasePointers()
  - This required changing of function signatures, constructors for many other classes in the codebase.
  - We assigned *MLP* number of pointers to start walking the chain from random addresses

Part 3
